## Notes:

### 1. Consignment Details

Use additional signed and dated pages if more space is needed to list the carcasses in the consignment covered by this statement.

### 2. Identifying Groups of Wallabies

You may tag or otherwise identify *groups* of wallabies where they:

- (i) are covered by a single poison use statement or DOC Pesticide Summary, as appropriate; and
- (ii) have been taken from areas of land that have the same poisoning status; and
- (iii) have been killed on the same date; and
- (iv) have been hunted, killed and dressed by or under the direct supervision of the same certified game estate supplier.

Otherwise you must tag or otherwise identify *each* individual carcass.

### 3. MRL and MPL

MRL means, in relation to a residue, the maximum permissible level of that residue as specified in the Food Notice: Maximum Residue Levels for Agricultural Compounds. MPL means the maximum permissible level at which a substance may be present in animal material or animal product as specified in the Animal Products (Contaminant Specifications) Notice 2008, as that notice may be modified or replaced under section 167 of the Animal Products Act.

### 4. Poison Use

Animals must not be presented for processing if they were procured from land on which any of the following poisons were laid, or within the applicable buffer zones of that land, unless the applicable caution period for that poison has passed between the time the poison was laid and the time the animal was procured. The applicable buffer zones and caution periods for each poison are set out in the following table.

Poison group	1	2	3	4
Poison	Zinc phosphide Para-aminopropiophenone Sodium nitrite Any other poison not covered in groups 2 to 4 (except sodium cyanide, potassium cyanide or cholecalciferol)	Diphacinone Pindone	Coumatetralyl 1080	Brodifacoum Difethialone Bromadiolone Flcoumafene Difenacoum
Caution period (all species)	1 month	2 months	4 months	3 years
Buffer zone	Thar, wallabies	1 km	1 km	1 km
	Goats, chamois, deer and buffalo	2 km	2 km	2 km
	Pigs	2 km	2 km	5 km

Regardless of the above table, a certified game estate supplier may present for processing animals (except pigs) procured from any land (except land administered by the Department of Conservation) if:

- (a) the poison was used solely in bait stations that were correctly situated and used; or
- (b) the poison was used solely in buildings that could not be accessed by the applicable animal; or
- (c) the poisons used were inaccessible to the animal due to impassable geographical features (such as rivers, sea, cliffs or steep ravines).

To avoid doubt, the above exceptions do not apply to:

- (a) pigs; and
- (b) poisons in group 4; and
- (c) land administered by DOC.

### 5. Veterinary Medicines

If you have killed animals and believe they are within a withholding period for a veterinary medicine they must not be presented for processing. If you do not know the withholding period for a veterinary medicine, the following default periods apply and is the time which must pass before the animals can be killed for processing:

- 91 days for ruminants such as deer, goats, thar, chamois and buffalo;
- 63 days for monogastrics and camalids such as pigs and wallabies.

**6. Johne's Disease Vaccination (deer and goats).** The statement must be ticked 'yes' when any of the animals have been vaccinated with Johne's disease vaccination or you believe a previous owner may have vaccinated them.

**7. Electronic Submission.** This statement may be provided electronically, but only with the consent of the recipient.
